

OFFICIAL PRESS RELEASE

Genre-bending Producer LdashD releases new EP

'Bringin' back the 90s'

With 4 tracks titled: 'Straight Outta Magazine', 'Things Change', 'Watcha Know' and the title track 'Bringin' back the 90s'

This latest EP from LdashD once again reveals his unique take on Dance Music, classic beatboxes, heavy-duty multi-amped electric guitars, fat analogue synths graciously battle it out while simultaneously mingling with various vocals and instruments from around the World, resulting in huge scintillating sonic landscapes that bind genres by defiantly crossing the territorial boundaries often foisted on the public by backward looking labels etc.

Futuristic dance music that encapsulates the magnificently rich seam of pop history running from the 50's to present day, that works just as well away from the dancefloor, at work, home and especially in the car, as it makes a long journey seem much shorter, so stick this EP on, or any of the others, and the journey time will just melt away.

WARNING: Please beware to take care when approaching though, as LdashD's music is not designed for the musically nostalgic or faint of heart.
